

Maximize the Value of Your Hidden Assets!

Worldwide Supply, the industry leading TL9000/ISO9001 certified buyer and supplier of networking equipment, is proud to offer our latest service innovation.

TradeNet  TM
Maximizing Your Hidden Assets

New!

Simply put, TradeNet™ is a trade & exchange program that enables you to trade your excess, outdated or simply unused networking equipment (those routers, switches or CMTS units sitting in your warehouse gathering dust, or taking up warehouse space and costing money) for the equipment you need...or for cash.

What makes it work is our proprietary sourcing program that knows in an instant the location of virtually every piece of networking equipment in the country. Combined with our extensive inventory of networking equipment, we can find what you need instantly.

- No shipment delays.
- No waiting for OEM deliveries.
- No service disruptions.

You are up and running overnight. TradeNet is your competitive edge.

And that excess or unused equipment is off your books. No cash changes hands, unless you want us to buy your equipment outright. That is our service guarantee to you.

Think of TradeNet as a way to harness the power of your hidden assets – transforming CapEx into NoCapEx.

As companies are forced to migrate to the next generation of technology to remain competitive, TradeNet from Worldwide Supply offers a way of acquiring that new technology without the high cash outlays or costs associated with technology migration. Fast, flexible, TradeNet is a win-win for everyone.

Let us help you find those hidden dollars.

Worldwide Supply
World Class Service, Quality & Availability. Guaranteed.
